

FWPFGM3212 Fall trees manually [intermediate]

Persons found to be competent in this unit should be able to effectively fell most trees except for the very large and those that have significant defects and/or characteristics causing excessive complexity. It provides detailed instruction on how to fall trees (up to 80 cm in diameter and 40 metres in height on a maximum ground slope of 15°) and deal with typical hazards encountered in a forest or bushland setting. The course also covers basic chainsaw maintenance and sharpening. The second and third days of training is carried out in the forest, where participants are given extensive practical experience in cutting and boring techniques, scarf cutting, back cuts and the use of wedges. Duration 4 days.

Requirements

- Participants must wear steel capped footwear. STO can provide Hi Visibility Clothing and Hard Hats. For any specific PPE requirements please contact STO
- English language skills need to be sufficient to understand and comprehend written and verbal instructions
